## Yellow Gasline PTFE Thread Seal Tape

### Design Features:

- 99% Polytetrafluoroethylene and 1% Pigment
- 4 Mil Thick
- .9 Density
- Imported

### Operating Specifications:

**Temperature:** -450° to +550° F\*

**Elongation Pressure:** 10000 psi

**Use:** Designed for gaslines of all types: natural gas, propane and butane lines. Meets gas company standards worldwide. Seals threads easily and quickly with confidence. To be used on all types of threaded fittings for passage of water, potable and non-potable, most chemicals, oxygen, gas, hydraulic and high pressure lines. Avoid using on molten alkali, certain halogen products and fluorine at high temperatures and pressures.

\*When heated over 500° F the PTFE will thermally degrade and decompose producing toxic fumes.

W-R#	Description	Weight	Min	Box
