Silver King® “Squick” Boiler Cleaner

Design Features:

- Absorbs Grease Oil, Rust, Dissolved and Suspended Solids
- Prevents Formation of Insulating Scale and Crystallizing Solids
- Prevents Corrosion - Protects Metal Surfaces
- Neutralizes Free Oxygen
- Prevents Foaming, Surging or Priming
- Maximizes Heat Transfer
- Safe to use in all Boilers
- Contains no Petroleum or Hazardous Components
- No Draining, no Blow Down Required (Precipitated Sludge May be Drawn off)

Use: Original Silver King “SQUICK” is scientifically formulated to clean and protect steam boilers by a patented absorption/precipitation process. “SQUICK” Prevents formulation of insulating scale, protects metal and prevents priming or surging. Patented “SQUICK” maximizes efficiency and prolongs the useful life of the boiler.
